

VIP-Universal Swivel UW-PP-10

Artikel-Nr: 7990881

- With a ball bearing which enables swiveling under load.
- Patented clevis system facilitating a universal connection
- Can be loaded in all directions with the shortest combination possibilities.

Assemble only with approved RUD - VIP - chain and ring components:

- VIP-Cobra eye hook VCÖH
- Oval-Link PP-B for PowerPoint

Attention: The VIP-Chain connection is fool-proof. When assembling, especially with the ring components, pay attention to the correct WLL! Not suitable for permanent use and swiveling under full load. Connecting bolt and tensioning sleeve are pre-assembled. The DGUV-rule 109-017 stipulates that slings never be used while in a twisted condition. This requirement is automatically met by the UW-PP because of the integrated ball bearing.

VIP-Universal Swivel UW-PP-10
