

SBS Andis 1100 trailer lock

With the SBS Andis 1100 lock you can optimally protect your trailer with 2 inch kingpin against theft.

The SBS Andis 1100 kingpin lock is suitable for securing trailers and semi-trailers against theft. The lock consists of a steel fender with a rubber housing, so that the kingpin mounting bolts are completely closed and break-in attempts are prevented. The trailer lock is easy to install with the rubber handle.

The kingpin lock is equipped with a recodable Abloy Protec² cylinder. Thanks to this cylinder, fraud with keys is impossible and an extra key can only be requested with the key card. Suitable for securing semi-trailers / trailers with a standard 2-inch Kingpin.

KIWA SCM CERTIFIED SECURITY LOCK

The SBS Andis lock is Kiwa SCM heavy duty approved, which means that the lock keeps professional thieves busy for at least 5 minutes. The Kiwa SCM quality mark is important to insurers because it proves that a vehicle has been fitted with an approved and certified security device.
