

OptiLock ELB-Lock

OPT-01A-2505

The potential cost of cargo theft is significant for fleets considering its value and potentials for customer penalties and vehicle damage. OptiLock's primary benefit is to offer peace of mind for everyone involved in the supply chain, from fleet managers to drivers and customers. It protects against a variety of potential theft eventualities, as well as mitigating the risk of fraud, proving vital in keeping supply chains uninterrupted with intuitive solutions.

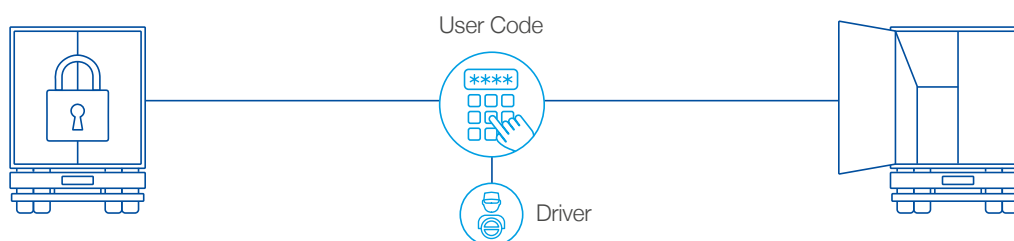

SECURITY YOU CAN TRUST

- Prevents theft of vehicles.
- Avoids theft and exchange of goods.
- Helps prevent transport of unregistered goods.
- Restrains interruption of the cooling chain.
- Enables and improves compliance with Transported Asset Protection Association (TAPA).
- Offers solutions for a wide range of vehicles (e.g. containers, semitrailers and drawbar trailers).

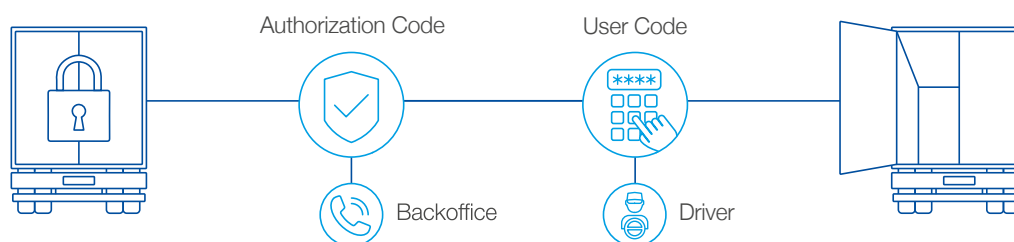

SECURITY TAILORED TO YOUR BUSINESS

- Wide range of locking systems – from mechanical to electronic.
- Range of variable locks can be used on different vehicles.
- OptiLock™ ELB-Lock®, the electronic built-in locking system, can be steered remotely with Transics TX-TRAILERGUARD.
- Fixed locking systems enable an easy handling.
- Protecting doors or vehicles.
