

POMMIER
innovative solutions for trucks

**X-CROSS
CONCEPT**

TÜV

MECHANICAL PERFORMANCE GUARANTEE

The new range of POMMIER clamps for accessories and boxes provides a clamping solution for every configuration. Their multi-function capability, certified mechanical strength and production control provide balance, performance and safety.

A600

C450

C600

One clamp covers a wider range of material thickness **WIDE CLAMPING RANGE**

The design of the POMMIER accessory and box clamps allows considerable variation in tightening parameters. They are therefore compatible with every utilisation application and all types of vehicle. In addition, their multi-function capability reduces the number of different pieces to be managed.

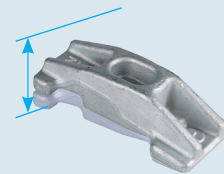

-10%

Compared with a standard configuration, the X-CROSS concept reduces the number of clamps required by 10%.

Well-shaped, with an "x" format design NEW: THE X-CROSS CONCEPT

The large contact pad on the box side provides both stability and load spreading. On the vehicle side, the clamp is balanced by the smaller and anti-rotation pad. Finally, the central zone is strengthened to easily accept the standard screw tightening torque.

The new C600 X-CROSS clamp is stronger, thus allowing greater spacing between clamping points.

TÜV

MECHANICAL PERFORMANCE GUARANTEE

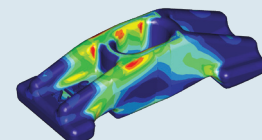

The clamp is the joining element that secures a box or various accessories on the chassis. POMMIER is fully aware of the importance of this component in terms of safety, and therefore decided to guarantee its performance and reliability in anticipation of the requirements of any future clamping standards. For this reason, every model is tested and certified by TÜV, an independent laboratory.

Optimum geometry and hle grade steel

COMPACT, WITH HIGH PERFORMANCE

The design of the new clamps optimises material distribution. The various models are lighter and smaller, while guaranteeing high mechanical strength. In addition, the clamps are forged in HLE (High Limit of Elasticity) grade steel, giving very high strength characteristics.

Know-how at the service of safety

100% DESIGNED AND MANUFACTURED BY POMMIER

POMMIER has considerable design and manufacturing experience in the field of clamping.

The clamps are forged in France, in the POMMIER NEUFMANIL plant, using steels with high mechanical properties.

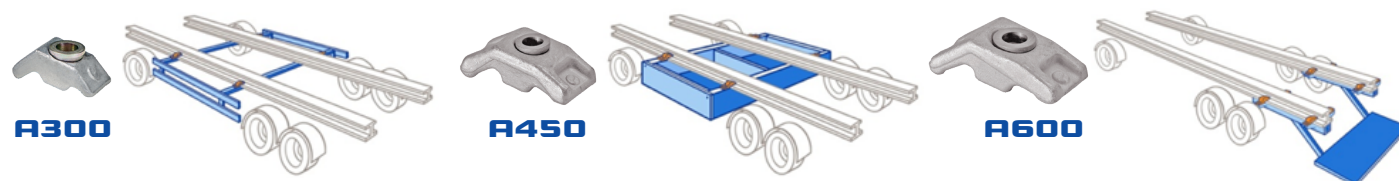

They are inspected by our production site personnel and tested under severe use conditions, which ensures optimum quality control.

With POMMIER clamps, accessories and boxes are firmly attached for many years.

CHARACTERISTICS

Accessory clamps

	Applications	Mechanical strength	Range of tightening	Dimensions	Screw	Reference
A300	Lateral protection, tool box...	300 daN	3 to 18 mm	25 x 24 x 50 mm	M10/M12	3643841
A450	Pallet box, wheel holder...	450 daN	4 to 20 mm	35 x 39 x 73 mm	M12	3643842
A600	Tail lift, tank...	600 daN	5 to 22 mm	40 x 33 x 85 mm	M14	3643843

Body clamps

	Applications	Mechanical strength	Range of tightening	Dimensions	Screw	Reference
C450	Truck or Refrigeration box	450 daN	5 to 10 mm	46 x 32 x 101 mm	M12	3643846
C600	Truck or Refrigeration box	600 daN	3 to 12 mm	50 x 35 x 115 mm	M14	3643848

All models are galvanised
