ALLROUNDER FOR PROFESSIONAL VEHICLE CLEANING AND CARE

TERMINAL-SERIES: ALLROUNDER FOR PROFESSIONAL VEHICLE CLEANING

EHRLE MultiTerminal

EHRLE MultiTerminal

The EHRLE MultiTerminal is the perfect addition to a modern self-service carwash. It allows your customers to clean and care for their vehicles professionally and flexibly, both inside and out. Thanks to six versatile programmes, there is a suitable programme for every requirement.

The MultiTerminal series is available in four different versions as a **4-in-1**, **5-in-1** and **6-in-1** variant. The cleaning station can be installed between the care stations to save space, allowing two customers to use it at the same time.

Overview of cleaning and care programmes:

VACUUM CLEANER

TORNADO NOZZLE

AIR GUN

TIRE INFLATOR

TIRE SHINE

FRAGRANCE SPRAYER

The advantages for you:

Ergonomic design: All care tools are clearly arranged and within easy reach in storage compartments above. The customer can conveniently pull out the tools they need and take them to the vehicle.

Automatic retraction: After use, the hoses are automatically retracted and safely wound up in the device.

Easy to use: Illuminated programme buttons allow you to select the desired applications intuitively.

Flexible payment options: Payment can be made in cash, with tokens, using a CarWash Key or by credit card. The terminal can also be connected to EHRLE CentralPay system.

The MultiTerminal can be placed under the **EHRLE steel construction** so that your customers can clean their vehicles even in bad weather conditions. You can also install additional cleaning equipment, such as the **EHRLE Mat-Cleaner**, under the construction. **The roof load of the construction is also suitable for PV systems.**

All information about our **cleaning and care products** for the MultiTerminal can be found on pages 94-95.

MULTITERMINAL

Basic programmes

VACUUM CLEANER:

- Specially rotating suction nozzles with side By-Pass openings to prevent the nozzle from being sucked into the interior
- Vacuuming without filters or dust bags. Completely mechanical, based on the principle of a tornado

TORNADO NOZZLE:

- Thorough cleaning and care of the vehicle interior
- Quick and easy cleaning of particularly hard to reach areas such as ventilation slots, seat rails, door sills, upholstery etc.
- A small amount of cleaning solution is added to the air flow of the tornado and the resulting film of moisture greatly enhances the cleaning and care performance
- The tornado cleaning nozzle impresses with its high air flow rate and very intensive pulse effect

AIR GUN:

- Excellent for cleaning vehicle interiors, cockpits and ventilation systems
- Effortless removal in hard to reach areas
- The nozzle tube is made of stainless steel and rounded on the nozzle side so that the interior cannot be damaged

MULTITERMINAL

Additional programmes

TIRE INFLATOR:

- The tire pressure is preset using push buttons and remains unchanged for all subsequent inflations.
- Simply attach the device to the tire and the air pressure in the tire is automatically balanced. After the tire inflation process is complete, an acoustic signal sound will be heard
- The pressure value can be read accurately on the built-in LCD display, even in poor lighting conditions.

TIRE SHINE:

- Easy and quick application of tire shine with the tornado nozzle
- Cleans, cares and protects car tires and ensures a long-lasting, rich and deep shine
- The rubber is cared for and, with regular use, protected against cracking and premature ageing
- UV protection prevents premature fading
- The deep black, shiny look lasts for several weeks

FRAGRANCE SPRAYER:

- Ensures a pleasant and subtly scented atmosphere in the vehicle interior
- Intensity can be selected by varying the amount of product used
- Eliminates unpleasant odours
- Easy to apply with the fragrance spray gun
- Pleasant, anti-allergenic and ecologically optimised fragrances

- Vacuum cleaner
- Tornado nozzle with cleaning agent dosing system
- Air gun 3bar
- Tire inflator with memory

Vacuum cleaner:

Suction capacity	3700l/min
Vacuum	160mbar
Dirt container	50l

Compressed air production:

2 cylinder piston compressor (oil-free)

Compressed air intake capacity	2x100l @8bar (0,8Pa)
Zwei Aluminium Druckbehälter	35l @ 10bar max. pressure with safety device
Pressure reducer for high and low pressure system	

General:

Device dimensions (LxWxH)	200x110x240cm
Weight	495kg
Suction mast height	3.0m
Electrical connection	3/N/PE/50Hz/400V
Connected load	3,8kW/16A/fuse protection 20A
Length of suction hose for vacuum	4,5m
Length of Tornado hose	10m
Length of hose for air gun	10m
Length of tire inflation hose	10m

Art.No. **195002**

- 2x Vacuum cleaner
- 2x Tornado nozzle with cleaning agent dosing system
- 2x Air gun 3bar
- 2x Tire inflator with memory

Vacuum cleaner:

Suction capacity	2x3700l/min
Vacuum	160mbar
Dirt container	2x50l

Compressed air production:

2 cylinder piston compressor (oil-free)

Compressed air intake capacity	2x100l @8bar (0,8Pa)
Zwei Aluminium Druckbehälter	35l @ 10bar max. pressure with safety device
Pressure reducer for high and low pressure system	

General:

Device dimensions (LxWxH)	200x110x240cm
Weight	566kg
Suction mast height	2x3.0m
Electrical connection	3/N/PE/50Hz/400V
Connected load	7,4kW/16A/fuse protection 20A
Length of suction hose for vacuum	2x4,5m
Length of Tornado hose	2x10m
Length of hose for air gun	2x10m
Length of tire inflation hose	2x10m
