

ICE-Lashing Chain-Ergo-10

Artikel-Nr: 7900027

ICE-Lashing chain - Standard with a captive on the chainstrand assembled ICE-ratchet tensioner, combined with quick connection ICE-CURT-SL. Fast pretensioning and shortening without idle stroke. Significant weight reduction compared to Grade 80 lashing chains and improved handling.

- Length: 3500 mm.
- Permissible lashing capacity (LC) = 10000 daN (kp).
- Standard Tension force (STF) = 2800 daN (kp).

Surface: ICE-Pink powder coating. Please observe DIN EN 12 195-3, and VDI 2700 ICE-VSK Lashing chains must not be used for lifting loads. Hooks and tensioners should not be loaded while positioned at corners. When "sharp edges" occur (if the radius of the work piece is smaller than the diameter of the lashing chain) please use edge protection devices or reduce the lashing capacity (LC) by 20%. If you have further questions : Please ask for our scientific paper with calculation examples and order our ICE/VIP-Lashing card.

ICE-Lashing Chain-Ergo-10

Artikel-Nr: 7900027

weight	16.20 kg	35.71 lbs
T	3500 mm	138"
Lashing capacity	10000 daN	null
STF max (daN)	2800 daN	null
