

Lashing Rings

A wide range to meet all your needs

A complete range

A solution for every need

The Pommier range is made up of several different possibilities answering to a wide range of needs such as fixing a load to the floor with recessed lashing rings or to the siderave, or with the Heavy duty application you can even fix the vehicles themselves.

Steel « HLE »

Very high strength quality

The rings are forged in our Pommier factory in France with very high strength quality steel. This material has an extremely high mechanical resistance.

Approved by TÜV

High quality manufacturing

The rings are tested and approved by the TÜV following the current European legislation.
