MATCLEANER FOR PROFESSIONAL CLEANING OF CAR MATS

CLEAN CAR MATS IN JUST A FEW SECONDS

MatCleaner

Powerful mat cleaner EHRLE MatCleaner

With the EHRLE MatCleaner, you can offer your customers a particularly efficient and versatile solution for cleaning carpet and rubber mats. The device impresses with its user-friendly handling and flexible selection of cleaning options for thorough cleaning and care of vehicle mats.

The MatCleaner offers two main cleaning methods: **wet cleaning and dry cleaning.**

Wet cleaning can be carried out easily with water or, if necessary, with cleaning agent using the „chemical dosing“ function. This allows even stubborn dirt such as mud or salt residues to be removed effectively. Thanks to its high cleaning power and precise dosing, the device is economical and environmentally friendly to use.

For dry cleaning, the mat is thoroughly brushed to remove dust, dirt and loose particles. A particularly practical feature is that after wet cleaning, the mats can be dried using the integrated drying fan function, so that they can be used again immediately. Payment can be made by card, cash, coins or via a key system. This ensures maximum flexibility and convenience, which increases customer satisfaction.

MATCLEANER

Application example

- 1** The first step is to use the „Dry cleaning“ programme to clean the car mat thoroughly with the brush. This step removes coarse and fine dust particles.

- 2** In the next step „Wet cleaning“ the car mats are cleaned with the brush and the help of water for even more thorough cleaning.

- 3** With the addition of „Chemical Addition“ on the EHRLE MatCleaner, the car mats can be cleaned with the „MC MatCleaner“ detergent product which leaves a pleasant fresh fragrance behind.

- 4** In the final step „Fan drying“ the car mats are dried and therefore can be put straight back into the car.

CLEANER FOR EHRLE MAT CLEANERS
